TC 3700 MAIL ROOM

REMARKS

UNMARKED CLAIMS

1. A substantially triangular-shaped over-cap, comprising:
- a) a body having a substantially triangular-shaped perimeter with three perimeter corners and three perimeter sides, the body further having an area; and
 - b) a skirt extending substantially continuously about the substantially triangular shaped perimeter, the skirt including a skirt corner extending substantially downwardly from one of the perimeter corners, the skirt corner including at least one inner extension extending toward the area adjacent to the body, wherein the total length of all of the inner extensions in combination is less than about 70 percent of the total length of the perimeter.

Objections to the Drawings

The Examiner has objected to the drawings "because they fail to show the plastic material of the over-cap in the cross-sectional views *as described in the specification*."
